

María Pilar Sabena

Computer Engineering

I'm in my final year of Computer Engineering, with a background in economics and international sales experience. What excites me most is where technology meets people.

About me

I love figuring out what people actually need and turning it into something real: a website, a tool, or a clearer way to show why a product matters.

I bring together a solid technical background, real sales experience and a genuine love for languages and cultures. AI is part of my everyday toolkit for creating, analyzing and communicating.

Final year

Computer Engineering, UNC

Spanish, English and Italian

Citizenship

Argentinian and Italian

Experience

2025 – present

Product, data & web development

Forest S.R.L. · Córdoba

- **Management app (my capstone project, in progress).** I'm building a tool that helps supervisors log each site visit (what they saw, what was done and what's still needed) and follows every supply order from request to delivery, so the team can see how long each step really takes.
- **Company website.** Built and launched forestsrl.com.ar.
- **Accounting data analysis** that helps the team make better decisions and keep things on track.

2023 – 2024

Private tutoring

University students

- Tutored fellow students in physics, calculus and electronics.

2022 – 2023

Sales lead

Work and Travel · California, USA

- Sold skincare products face to face, in English, to people from all over the world.
- Handled the whole sale in a single conversation: letting people try the product, showing how it works, understanding what they needed and closing the deal.
- **Consistently beat my sales targets.**

Reading

■ What I bring

01

I understand the tech I sell

As an engineer, I can explain clearly and simply how a technical product works and why it matters.

02

Real sales experience

I sold face to face in the US, in English, to customers from all over the world, closing each sale on the spot.

03

Communication without borders

I speak Spanish, English and Italian, and I connect easily with people from different cultures.

■ AI as an ally

AI is part of how I work every day: I use it to design, build and document solutions. What I bring is knowing which problem to solve, asking the right questions and taking a critical look at the results, backed by a solid foundation in software engineering.

■ Education

Computer Engineering

National University of Córdoba · 2022 — present

In my final semester, doing my capstone project and internship at Forest S.R.L., plus an elective in Software Quality Management and a Computer Architecture course.

High school diploma in Economics

Colegio La Salle Argüello · 2015 — 2020

Graduated with an 8.45/10 average and honors. My classmates elected me to represent more than 200 students on the student council.

English

Instituto Saint Marks · 2015 — 2020

Six years of English studies, where I was named both best student and best classmate.

SOFTWARE

SYSTEMS AND NETWORKS
